MITIGATED NEGATIVE DECLARATION

MITIGATION MONITORING AND REPORTING PROGRAM

Introduction

This Mitigation Monitoring and Reporting Program (MMRP) has been prepared pursuant to Section 21081.6 of the California Public Resources Code. A MMRP is required for the Approved Project because the Mitigated Negative Declaration (MND) has identified potential adverse effects that will be reduced to less-than-significant levels through the implementation of mitigation measures. The numbering of the individual mitigation measures follows the numbering sequence as found in the MND.

Mitigation Monitoring and Reporting Program

The MMRP, as outlined in the following table, describes mitigation timing, monitoring responsibilities, and compliance verification responsibility for all mitigation measures identified in the MND.

The City of Concord (City) will be the primary agencies responsible for implementing the mitigation measures. The City may choose to require the project contractor to implement specific mitigation measures prior to and/or during construction. In some cases, the City or other public agencies will implement measures.

The MMRP is presented in tabular form on the following pages. The components of the MMRP are described briefly below:

- **Mitigation Measures:** The mitigation measures are taken verbatim from the MND, in the same order that they appear in the MND.
- **Timing/Frequency of Action:** Identifies at which stage of the project mitigation must be completed and how it will be implemented.
- **Responsible of Implementing:** Identifies the agency or department within the City responsible for implementing the mitigation measure.
- **Responsible for Monitoring:** Identifies the agency or department within the City responsible for mitigation monitoring and enforcement.
- **Verification of Compliance:** Identifies the initials of the responsible agency's representative and the date the representative verified implementation of the specific mitigation measure.
